

Clamping frames and curves

The band clamp BAN 700 and the Vario corners BVE – the perfect pair for gentle, non-warping clamping.

For even clamping on both sides without warping or skewing of the work piece

Clamping curves, polygonal connections and closed contours are traditionally some of the most difficult clamping jobs. BESSEY has come up with a startling solution to this problem: in the form of the patented band clamp BAN 700, and the practical

Vario corners. These two products are suitable for all those situations where gentle, non-warping, all-round clamping is needed. Universally applicable. For wood and plastic as well as in metal construction. Secured by an automatic locking system that ensures even tractive forces on both sides, which do not slacken until the clamp is released. No warping – no stress!

Band clamps

Your benefits at a glance:

1 Band is drawn in on both sides

This ensures that the pressure is applied equally on all corners. This is just perfect for ensuring clamping without warpage.

2 Integrated coiling mechanism

The intergrated coiling mechanism is operated by a crank handle which avoids tangling of and damage to the band. So you never need to worry about your band getting "chewed up" ever again!

3 Practical Vario corners

Whether you need high pressure on mitre joints or precise adjustment to corners: The practical Vario corners with tilting pressure plates perfectly complement the BESSEY band clamp.

4 Extremely tearproof

The special woven polyester clamping band guarantees a high resistance to tearing, and a clamping range of 7 m. The simply closing system can be opened at any time, quickly and simply.

Band clamps

Band clamp BAN 700

N ^o	Clamping range	Band w x d				
		mm		kg	qty.	VB0003
BAN700	Up to 7 m	25 x 1	60°-180°	0.56	5	

- Even pressure on mitre joints
- Crank handle can be relocated for right and left-handed users
- Contains: 1 band clamp, 4 Vario corners
- Retail-ready packaging

Band clamp BAN 400

N ^o	Clamping range	Band w x d			
		mm	kg	qty.	VB0003
BAN400	Up to 3.8 m	24 x 1	0.48	12	

- Clamp right-angled work pieces with 4 plastic corners
- Even pressure at all 4 corners
- Retail-ready packaging

Vario corners BVE

N ^o	Band w x d		Suitable for			
	mm			kg	qty.	VB0003
BVE	25 x 1	60°-180°	BAN700, BAN400	0.10	5	

- Infinite angle adjustment from 60-180°
- Contains: 6 Vario corners
- Retail-ready packaging
