

High-performance snips with HSS edges

Best solution for every application

Guaranteed high performance

Made from the best grade steel with case hardened HSS cutting edges. Compared to conventional snips, these HIGH QUALITY – HIGH PERFORMANCE models will fulfill the most stringent requirements

regarding service life and cutting properties. Great for use on stainless steel & other hard sheet metals. Available in a wide variety of styles! Traditional designs, compound leverage designs, straight cutting, shape cutting, ideal pattern snips. The large selection makes find the right tool for the job easy!

D27AH shape and straight cutting snip – with case-hardened HSS edges for considerably longer service life.

Your benefits at a glance:

1 Longer service life

Tempered drop-forged cutting heads have hardened HSS inserts for a much longer service life and performance than conventional snips. Even when cutting the harder metals like stainless steel.

2 Compound leverage

Compound leverage considerably reduces the effort required. Improving productivity while reducing hand fatigue for the worker.

3 Ergonomic handle

The plastic grips on the ergonomically designed handles have soft cushion inserts that further reduce hand fatigue for the worker. The soft cushion inserts also keep the hand from slipping on the grips.

HSS-TiN shape and straight cutting snips
